

BUILDING CONTRACTOR LICENSES

B1 - Building Contractor General Unlimited license shall entitle the holder to contract for construction, alteration, or for any work that falls under any category of building contractor license on any type or size of structure permitted by the Uniform Building Code.

B2 - Building Contractor General Limited license shall entitle the holder to contract for construction, alteration, or repair with a maximum value of \$500,000 annually, or construction, alteration, or repair of one to four family residential buildings, together with those jobs encompassed within building contractor class B3 licenses for which he is otherwise qualified.

B3 - Building Contractor Specialty license shall entitle the holder to contract for construction in any other specific type of work, with a maximum value of \$100,000 annually, that is not covered by other building contractor licenses, including but not limited to minor house repair, maintenance, siding, roofing, and including plumbers or other specialty trades. This license will cover ONLY that specialty or those specialties listed on the application.

PUBLIC WORKS CONTRACTOR LICENSES

PW1 – Public Works General license shall entitle the holder thereof to contract for construction in connection with fixed works requiring specialized engineering knowledge and skill, including streets and roads, power and utilities plants, sewage and waste disposal plants, bridges, and overpasses. Also included are the scopes of work allowed by all of the other public works classifications.

PW2 - Public Works Earthwork/Paving Structure license shall entitle the holder thereof to contract for construction in the movement and alteration of earthen material by digging, trenching, grading or compacting the material for a cut, fill, grade, or trench. Installation of asphalt paving on streets and adjacent intersections, driveways, and parking lots; using materials and accessories common to the industry. Includes height adjustment of existing manholes, storm drains, water valves, cleanouts and drain grates and all necessary excavation and grading. Also includes the application of seal coating to paving surfaces. Includes repair of surface cracks and application of painted marking symbols.

PW3 - Public Works Utilities/Pipeline license shall entitle the holder thereof to contract for construction in the installation and repair of any project involving manholes, the laying of pipe for storm drains, water and gas lines, irrigation and sewers. Includes all necessary connections, excavation, and backfilling. All work necessary for the production and distribution of water including drilling well, setting casing and pump, related electrical work, related concrete work, excavation, piping for storage and distribution, storage tanks, related fencing, purification and chlorination equipment.

PW4 - Public Works Concrete/Masonry license shall entitle the holder thereof to contract for construction in all work in connection with the processing, proportioning, batching, mixing, conveying and placing concrete composed of materials common to the concrete industry, including but not limited to finishing, coloring, curing, repairing, testing, drilling, sawing, grinding, chipping and grouting. Placing of film barriers, sealing and waterproofing are included. Construction and assembling of forms, molds, slipforms, pans and centering. Trenching, excavating, backfill and grading in connection with concrete construction. Installation of embedded items essential to or comprising an integral part of the concrete or concrete construction including reinforcing elements and accessories. Installation of brick, concrete block, adobe units, stone, marble, slate or other units and products common to the masonry industry, including mortarless type products. Installation of grout, caulking, tuck pointing, sand blasting, mortar washing, parging and cleaning and welding of reinforcing steel related to masonry construction. Any or all of this work as it pertains to work within public rights of way.

PW5 - Public Works Blasting license shall entitle the holder to contract for construction in the use of explosives and explosive devices for the purposes of excavation, demolition, geological exploration, mining or any related blasting. Included is any drilling, boring, or earthwork required for the placement of explosive charges, the erection of temporary shelters, barricades, and associated protective devices, equipment, and enclosures.

PW6 - Public Works Specialty license shall entitle the holder to contract for construction in such public works fields as traffic signing and striping, installation of guardrail, fencing, landscaping, and any other specific type of work that is not covered by other public works licenses. This license will cover ONLY that specialty or those specialties listed on the application.
